EXPERIENCE

Marcon Healthcare, Jaipur — Business Analysis

MAY 2023 - JULY 2023

- Identify the sources of medicines sales data, which may include sales recorded, point-of-sale (POS) systems, and inventory databases.
- Calculate key performance indicators (KPI) such as sales revenue, profit margins and growth rates for each district. Data by district and analyze sales performance in each district.
- District with high and low sales, growth potential, and market saturation.
- Gather historical sales data from these sources

PROJECTS

Chat Application — [Simple Messaging App](#)

- Creating a chat application using PHP, MySQL, and JavaScript with a signup feature is a great project! After signing up successfully, users will be directed to a page displaying other users who have joined the app. This page will showcase their full names, profiles, images, active status, and more
- Once you've signed up, you can select any user to initiate a chat. Logging out is simple; just click the logout button. After a successful logout, you'll be redirected to the chat app's login page. Your status will display as offline for other users. To access the chat page again, simply log in using your registered email and password.

E-Commerce — [Website](#)

- E-commerce website's homepage design, we'll feature a banner section along with images highlighting various categories. Additionally, we'll showcase selected products, complete with their respective prices, images, and ratings.
- The homepage will display a range of the latest products, along with an exclusive offer section featuring a unique product. Further down, you'll find testimonials and a section dedicated to top brands. The footer will neatly summarize information in four columns at the bottom of the website

CERTIFICATIONS

- Web Development ([Internshala](#)): Successfully completed an 8-week online certified training on Web Development
- Successfully completed the course Mastering Data Structures & Algorithms using C and C++ ([Udemy](#)).
